CHART 1 Gross consumption of natural gas by OECD region

- Total OECD indigenous production of natural gas decreased by 3.2% y-o-y¹ in September 2023 compared to September 2022. OECD Europe and OECD Asia-Oceania experienced a respective decrease of 32.5% y-o-y and 8.2% y-o-y, while the OECD Americas saw an increase of 1.9% y-o-y. On a year-to-date basis², the overall OECD indigenous production showed a 1.6% increase, despite the observed decline in OECD Europe (-10.7% y-t-d). This decline in OECD Europe was mainly driven by decreases in Norway (-7.9% y-t-d) and the Netherlands (-35.2% y-t-d).
- Total OECD imports (entries)³ of natural gas dropped by 20.7% y-o-y in September 2023, led by a significant decrease in OECD Europe (-28.2% y-o-y). Within this region, flows from Russia remained low in the first three quarters of 2023 compared to the same period last year, showing a decline of 53.6% year-to-date. Despite this, there was a marginal increase in LNG imports (+2.1% y-t-d), supported by substantial intra-regional trade, particularly LNG imports from Norway, which saw a notable increase of 255.6% y-t-d.
- Total OECD exports (exits)³ of natural gas decreased by 13.7% y-o-y in September 2023, primarily due to lower exports in OECD Europe (-37.1% y-o-y) and OCED Asia-Oceania (-8.1% y-o-y), while the OECD Americas experienced a growth of 13.1% y-o-y. On a year-to-date basis, natural gas exports in the OECD Americas increased by 4.8% driven mainly by LNG trade. Notable, there were increased exports to other OECD countries, such as the Netherlands (63.3% y-t-d), Japan (45.1% y-t-d) and Italy (40.5% y-t-d), among others.
- Gross consumption of natural gas in the total OECD slightly increased by 0.9% y-o-y, driven by higher consumption in OECD Asia-Oceania (+5.2% y-o-y) and the OECD Americas (+3.4% y-o-y). In OECD Asia-Oceania, Japan (+13.0% y-o-y) and Korea (+21.4% y-o-y) witnessed the greatest increase in natural gas consumption. However., on a year-to-date basis a negative trend was observed for the total OECD, with consumption decreasing by 2.5% in the first three quarters of 2023. This decline can be attributed to the substantial drop in consumption observed in OECD Europe (-9.8% y-t-d).
- 1. Year-on-year (y-o-y) change over corresponding month of previous year.
- 2. Year-to-date (y-t-d) change over corresponding period (beginning of year to current month) of previous year.
- 3. Transit volumes are included. Trade amounts include intra-regional trade.

CHART 2
Indigenous production of natural gas by OECD region

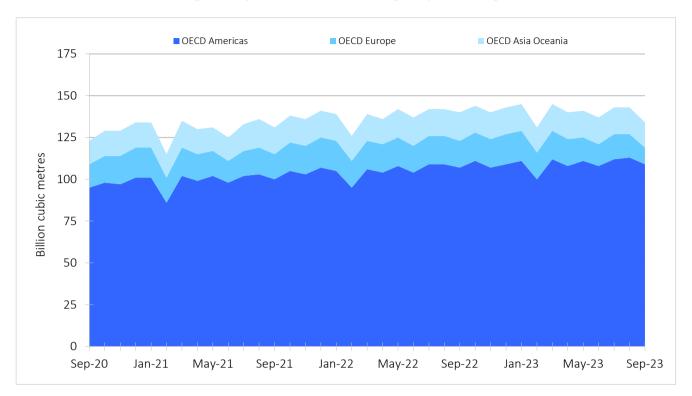

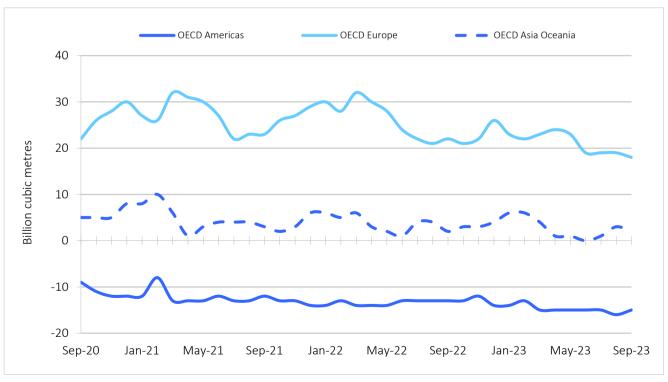

CHART 3

Net trade of natural gas by OECD region¹

^{1.} Trade amounts include intra-regional trade.

NOTES

Please note that all IEA data are subject to the following Terms and Conditions found on the IEA's website: http://www.iea.org/t&c/termsandconditions/

1) ESTIMATED DATA

Due to the absence of official data, the following data have been estimated:

Israel January 2010 to September 2023

2) COUNTRY NOTES

A General Note Starting with January 2011 data, the Imports and Exports no longer represent ultimate origins and

destinations but are replaced by Entries and Exits corresponding the amounts that physically crossed the

national boundaries of the country.

Australia The breakdown of export destinations is estimated by the IEA on the basis of OECD imports of natural gas

from Australia.

Belgium There is a change of methodology starting from January 2017, that provides monthly estimations for uses

that are not included in the main gas network data. These estimations aim to provide a complete figure of monthly consumption. As such, there is a break in series between December 2016 and January 2017.

Canada Data for Canada are submitted by the Department of Natural Resources (Natural Resources Canada, or

NRCan), based on actual and preliminary data from Canada's national statistical agency (Statistics Canada) and various other sources. In cases where data from these sources are unavailable, estimates are conducted by NRCan, based on information available at the time, including alternative sources. Data are usually finalised within three months of the first publication. An important source for any differences between data published

by Statistics Canada and data published by the IEA is data estimated by NRCan or the IEA Secretariat.

Chile Trade data from July 2023 are estimated.

Iceland There is no natural gas data for Iceland, as there is neither production nor consumption.

Israel The statistical data for Israel are supplied by and under the responsibility of the relevant Israeli authorities.

The use of such data by the OECD is without prejudice to the status of the Golan Heights, East Jerusalem and

Israeli settlements in the West Bank under the terms of international law.

Information is based on data published by the Ministry of Energy and Water Resources as well as the Central

Bureau of Statistics.

Mexico Observed gross inland deliveries of natural gas from January 2013 onwards are estimated.

Poland Starting from August 2023, production and trade data for Poland have been masked to ensure confidentiality.

Türkiye From July 2022, Turkey was renamed to Republic of Türkiye.

United Kingdom Exits to the Isle of Man are reported under Non-specified/Other.
